

DFS CDMA Professional CDMA Software

What u have to do first:

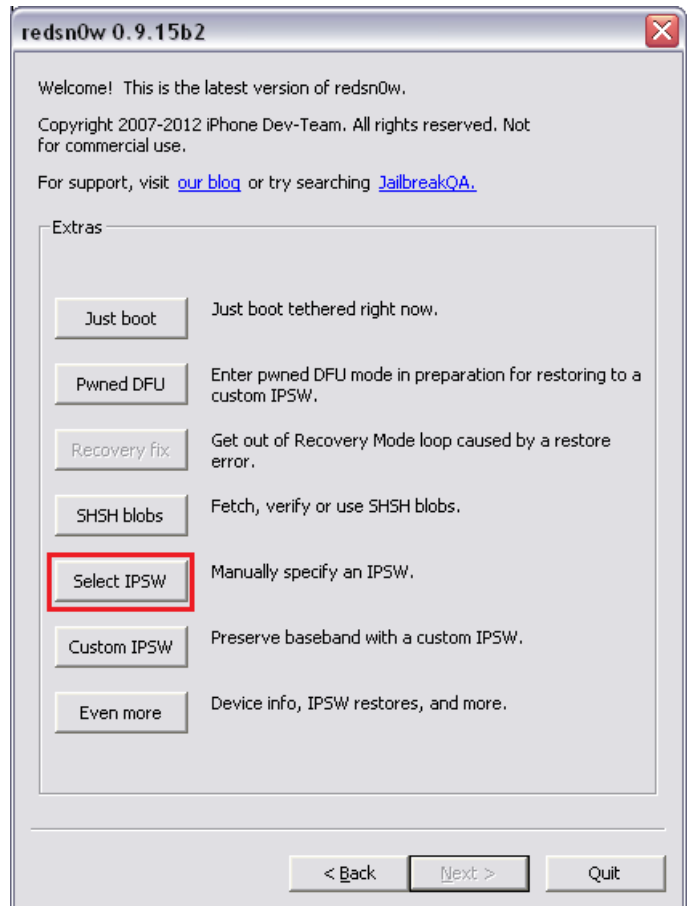

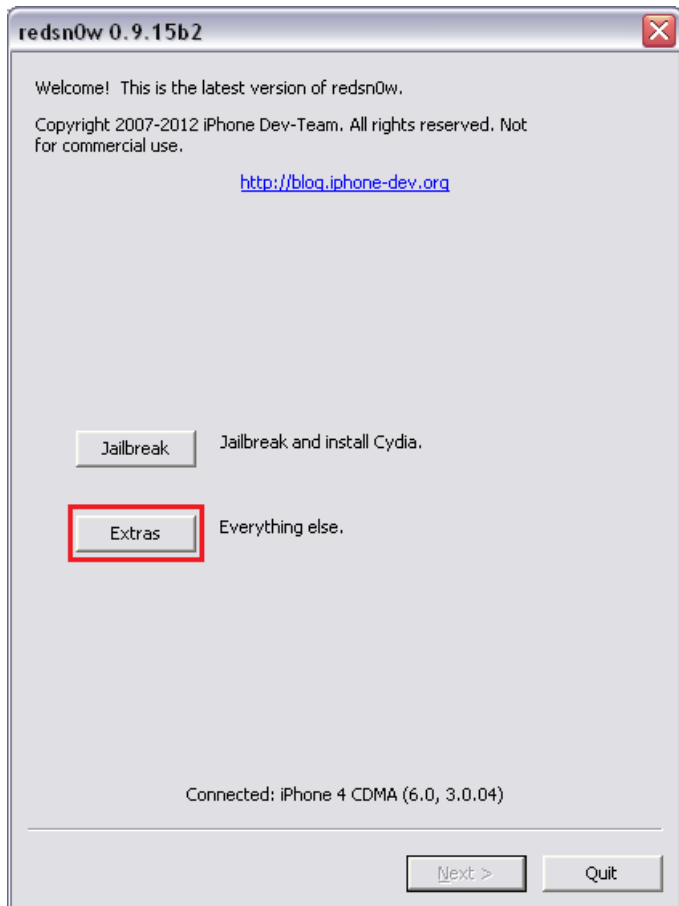

1. Your device is **iPhone 4 CDMA**
2. Have original **Apple USB** cable to connect
3. Have installed **iTunes**
4. Have installed **redsn0w (0.9.15b2)**
5. Have firmware **6.0 (iPhone3,3_6.0_10A403_Restore)**

Tethered jailbreak iPhone 4 CDMA (OS 6.0)

Open **redsn0w** and be sure you are still connected via USB cable to your computer.

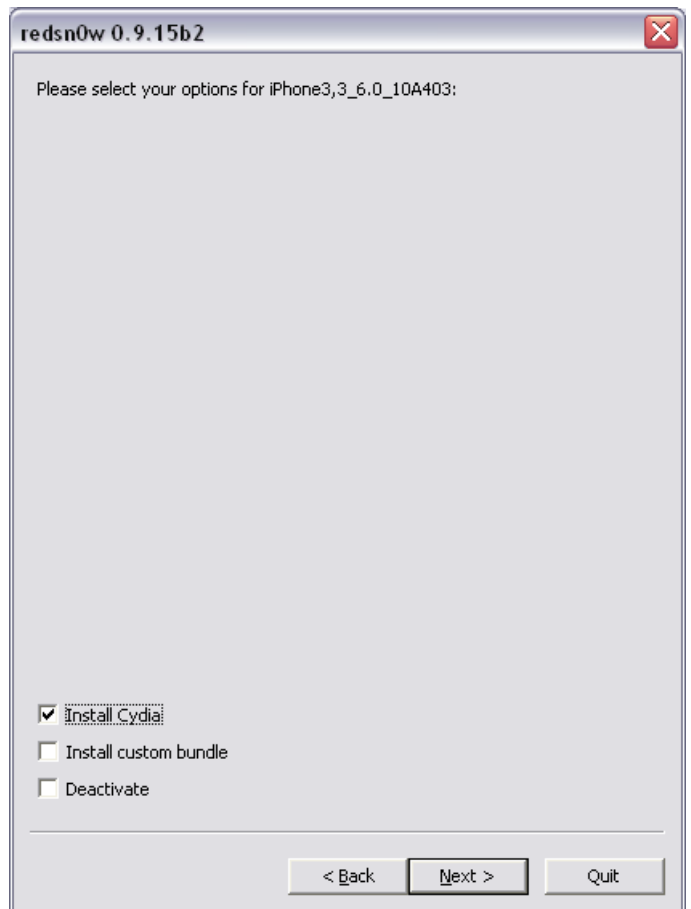

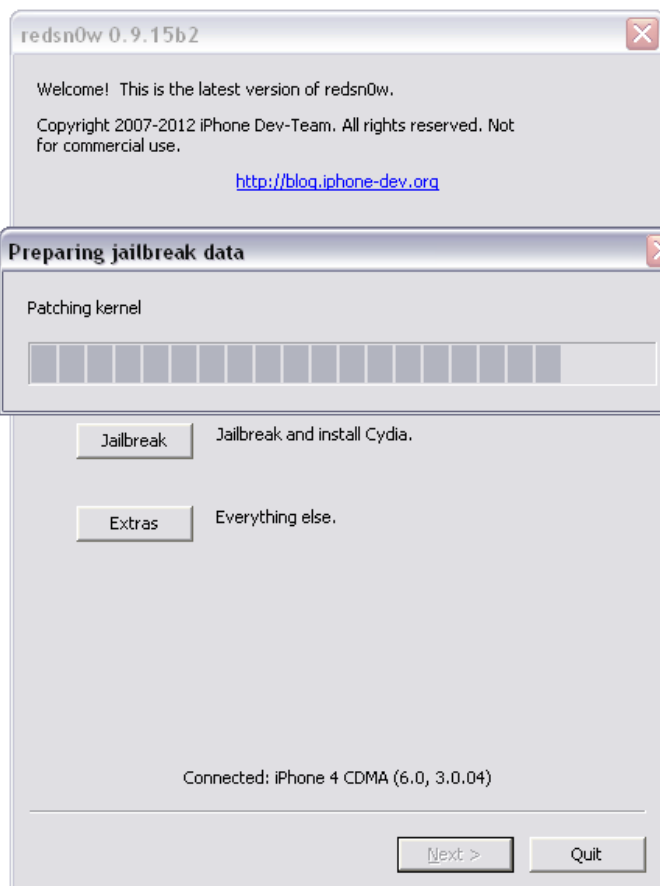

Select “**Extras**” followed by “**Select IPSW**“, and your iOS 6 firmware (**iPhone3,3_6.0_10A403_Restore**) and click “**OK**”

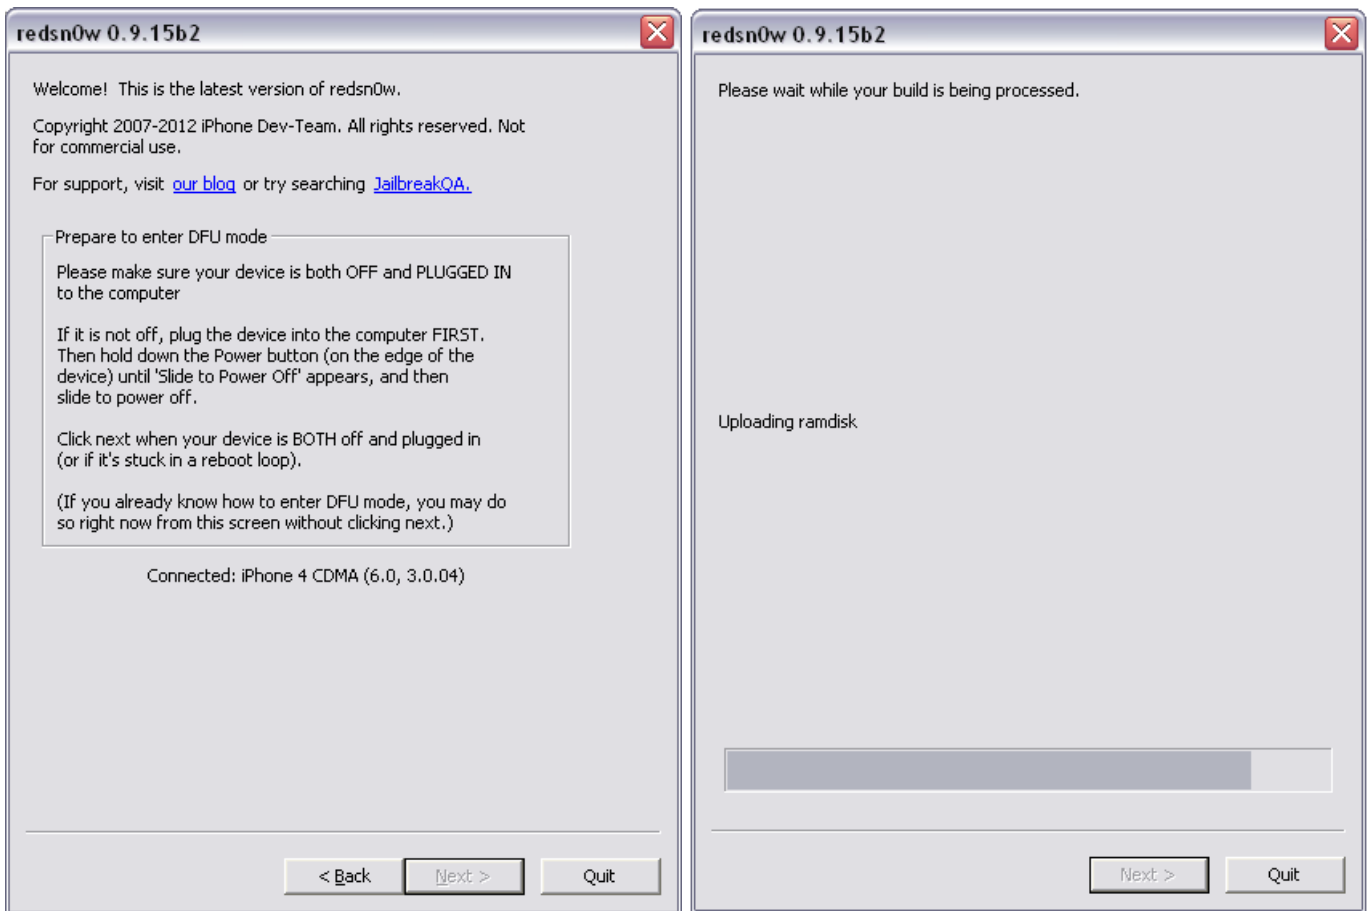

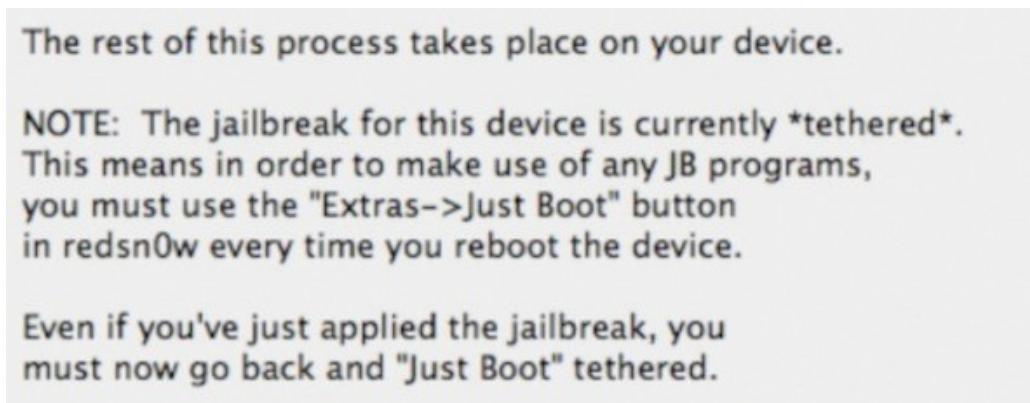

Click "**Back**", and then select "**Jailbreak**", Now redsn0w will inform you by a message box saying "**Preparing jailbreak data**" followed by a page with several options. Then select "**Install Cydia**" and click "**Next**".

Your iPhone will now proceed through the jailbreak process.

You will receive the below message:

Once the jailbreak is finished, place the device back into **DFU** mode.

*Hold down power button and home button both at the same time for 10 seconds
After the 10 seconds release the power button and still pressing on the home button for another 10 seconds*

Click "**Back**", and choose "**Just boot**" button. Once this finished close redsn0w.

Jailbreak is DONE
