

iDFS CDMA Professional CDMA Software for Apple devices

What u have to do first:

1. Your device is **iPhone 4 CDMA** or **iPad 2 CDMA**
2. Have original **Apple USB** cable to connect
3. Have installed [iTunes](#)
4. Have installed [Geeksn0w](#)

Jailbreak iPhone 4 CDMA (OS 7.1)

Open **geeksn0w** and be sure you are still connected via USB cable to your computer.

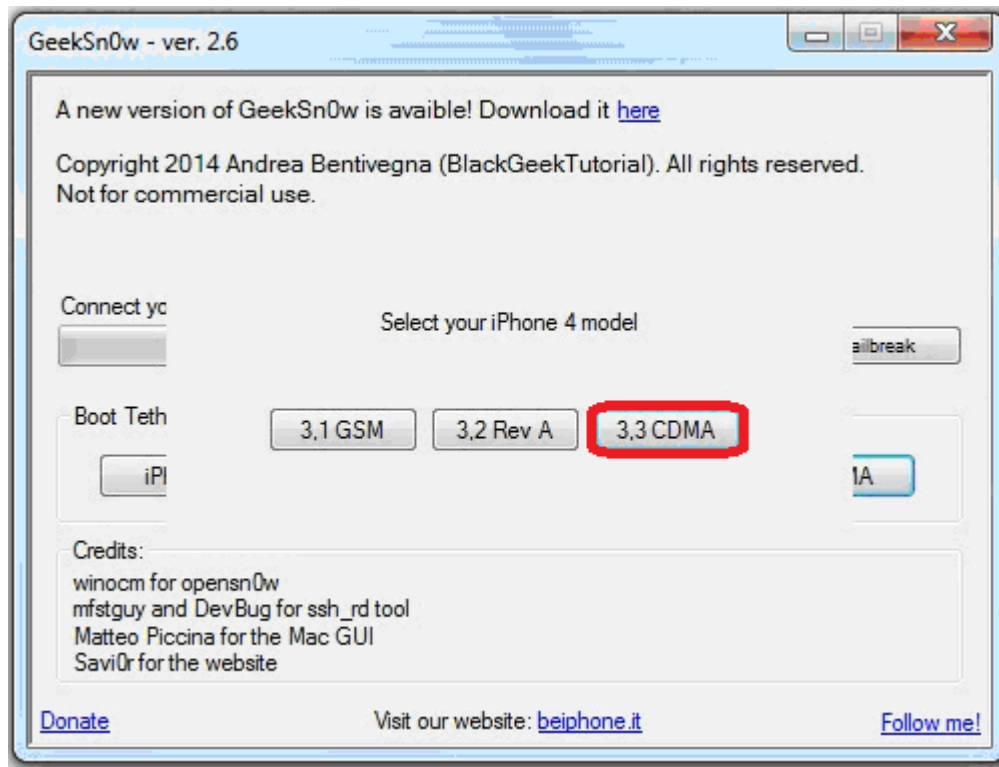

Click «**Jailbreak**» and wait... just be patient and do not disconnect your device.

DFS Professional CDMA Tool

After performing **Jailbreak** to do "**Boot Tethered**".

Jailbreak is DONE
